PLANT TOURS

for International Visitors to the United States

Washington, D.C.

This list is arranged by State and city. For those who are interested in locating plants of a particular industry, it is also classified by industry. The plants of an industry may be located by referring to the page numbers shown in the Industry Classification Index and then by finding the appropriate industry code number on those pages.

In all cases appointments for plant tours should be made *in advance,* either by telephone or letter. Write or call the official listed. It should be kept in mind, of course, that retooling operations, vacations, and emergencies may make it impossible for a plant to receive visitors at any given time.

Business groups planning visits to the United States should, when applying for their visas at American Embassies or Consulates, consult with the Commercial or Economic Officers. Not only can the staffs at the Embassies and Consulates be helpful in planning business trips but, after plans are finalized, they can announce your visit to thousands of business firms and organizations in the United States. Also ask about the Department of Commerce Commercial Invitation, which serves as a letter of introduction to U.S. officials and businessmen.

PLANT TOURS

for International Visitors to the United States

As part of the program to welcome international visitors to the United States, the United States Travel Service has compiled this listing of plant tours from information submitted by State-USTS liaison officers. It does not represent a complete listing of all tours, and in no way reflects upon plants that by inadvertence have been omitted. Revisions and additions to this list should be sent to the Visitor Services Division, United States Travel Service, Washington, D.C. 20230.
